

| Page | Problem | Heuristic issue | Severity | Mention by | Recommendation | Implementation |
|-------------------------------------|---------------------------------------------------------------------------------|------------------|----------|------------|----------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| Site wide | HTTP requests didn't work as expected. | Error prevention | Major | 2 experts | Place URL or HTTP requests inside a '.env' file to minimize the risk of human error. | Added the deployed and local URLs to a '.env' and appended the URL to the beginning of all HTTP requests. |
| Site wide (Header) | Account dropdown triggered on click instead of by hovering. | Efficiency | Minor | 1 expert | Replace the 'onClick' attribute with 'onMouseEnter' attribute for the element containing the dropdown functionality. | Moved dropdown functionality to a 'onMouseEnter' function to open the dropdown and closed the dropdown by hovering over the overlay that appears. |
| Checkout, Product-detailed, Results | Edge case where Boolean width values wouldn't trigger until the page refreshed. | Consistency | Minor | 1 expert | Use the 'react-responsive' package to use CSS media queries in React components. | Added 'react-responsive' package and used this in place of any Boolean width values. |
| Checkout | Clearing cart items one by one for large orders. | Freedom | Major | 1 expert | Add clear cart button that removes all items for the session user. | Added mass clear cart button that deletes all items from cart. |
