Page	Problem	Heuristic issue	Severity	Mention by	Recommendation	Implementation
Register form	Password requirements unclear.	Error prevention	Minor	1 expert	Add example input as a placeholder.	Added "E.g. Password123" as an example input to clarify the need for a capital letter and number.
All	The cookie expires too quickly, resetting the header and removing access to login features.	User control	Major	2 experts	Look into current expiration settings.	Removed deprecated 'expires' variable and used 'maxAge' in place.
All	Logo in header doesn't contain a return link	User control	Minor	1 expert	Use React-router's Link component to navigate to index on click.	Used React-router to add Link back to the index page when clicking the logo.
Results	Cannot search using product's brand name	Freedom	Minor	1 expert	Add a brand as part of the product name.	Each product name in the product's table contains a brand name as well as the type of product to trigger both sets of filters.
Checkout	Updating product quantity doesn't work on some browsers	Consistency	Major	1 expert	Look into specific errors between PUT requests and the browser.	Removed ending '/' from HTTP requests as this causes a bug on Safari and Firefox.
